

# Tempo Zero COA PLUS for Microsoft Dynamics 365 Business Central

It opens up cost accounting to different sources, managing information linked to forecast data or to areas other than accounting ones.

**NAV-lab Srl** Viale GranSasso 10, 20123 Milano - ITALY www.navlab.it www.business-central-app.it info@navlab.it | T.: +39.0308930933

## NAV-lab: the power of shared experience

NAV-lab was founded in 2003 by a group of IT managers who chose to offer their customers the ERP Microsoft Dynamics NAV, now *Dynamics 365 Business Central*, as a management system capable of giving flexibility, efficiency and competitivity to business processes in SMBs.

Since then, NAV-lab has become a fundamental partner for Microsoft in Italy.

The success of *Tempo Zero*, which minimizes the time of adoption of the ERP in the company, was confirmed by the rapid diffusion in terms of new users, until it became the most widespread solution today in Italy for those who chose the Microsoft ERP.

NAV-lab's strength is its joint investment in R&D: the software laboratory where technical resources, experience and skills, gained in the group's 12 software houses, are shared.

The high quality of the assistance services offered is highly appreciated, both in the ERP start-up phases, including the study and implementation of customised solutions and in the subsequent phases of support for users' daily work.

## **TEMPO ZERO COA PLUS**

**Tempo Zero COA PLUS** opens up cost accounting in Dynamics 365 Business Central to different sources, linked to areas other than accounting ones.

### ENHANCE COST ACCOUNTING for your company!

Do you need to monitor your business with management information related to forecast data and/or areas other than accounting? Do you want to manage in detail forecasts for orders issued or received, payroll accounting, cost centre or job order accounting?

### MEET YOUR PEOPLE'S NEEDS

The solution is for companies that need to manage their business with management information related to forecast data or areas other than accounting, provided in detail by cost types and cost centres.

This avoids, in the management of cost accounting, the need for users to record the detailed information, they consider useful, on files external (for ex. EXCEL) to the ERP and then set up manual entries.

### The app automates and completes cost accounting management.

You can do this easily with the Tempo Zero COA Plus APP that helps you manage your cost accounting in Microsoft Business Central.

Tempo Zero COA PLUS introduces automation to facilitate the entry of cost information that the company wants to monitor, in line with Italian procedures.

The app adds to *Tempo Zero COA*, its base module, and to *Business Central* the necessary features for the specificities of the Italian market (accrual date, simulations, etc...).

Through the data import setup page, it is possible to define data acquisitions from areas of Business Central other than accounting movements.

Here are some benefits:

- introduction of an environment for modular features into the ERP standard

- extension of the features of the company's standard environment with the acquisition of detailed information deemed significant, such as orders, loads and shipments, movements of other group companies.

### Tempo Zero COA PLUS: screenshot examples in Business Central

Setup of standard data acquisition procedures in Cost Accounting, with the capability to configure data import into analytics from custom sources
