Tempo Zero extensions integrate and exploit the power
of the Microsoft 365 cloud platform to the maximum

NAV-lab: the power of shared experience

NAV-lab was founded in 2003 by a group of IT managers who chose to offer their customers the ERP Microsoft Dynamics NAV, now *Dynamics 365 Business Central,* as a management system capable of giving flexibility, efficiency and competitivity to business processes in SMBs.

Since then, NAV-lab has become a fundamental partner for Microsoft in Italy.

The success of *Tempo Zero*, which minimizes the time of adoption of the ERP in the company, was confirmed by the rapid diffusion in terms of new users, until it became the most widespread solution today in Italy for those who chose the Microsoft ERP.

NAV-lab's strength is its joint investment in R&D: the software laboratory where technical resources, experience and skills, gained in the group's 12 software houses, are shared.

The high quality of the assistance services offered is highly appreciated, both in the ERP start-up phases, including the study and implementation of customised solutions and in the subsequent phases of support for users' daily work.

Tempo Zero Shipping EDI

ADDRESSES THE NEEDS OF YOUR PEOPLE

Are you looking for a solution to manage sales shipments more efficiently, directly from your ERP?

IMPROVES EFFICIENCY

With **Tempo Zero Shipping EDI** you manage every aspect of your shipments, **automate and optimize the entire process.** It is **not necessary to activate complex modules** such as Warehouse, in fact **the App activates a direct interaction with the courier,** without ever leaving Business Central, improving operational efficiency and reducing manual errors

INCREASES PRODUCTIVITY

From the ERP dashboard your collaborators **can manage all shipments, configure** the app independently and **monitor the progress of each shipment in real time,** thanks to **EDI (Electronic Data Interchange) integration.**
Once a sales order or provisional shipment has been registered, Tempo Zero Shipping EDI **automatically transmits the data to the courier, who will send the label to be printed and applied to the packages.**
This total integration into the ERP flow **increases the speed of operations, drastically reduces errors and downtime,** and offers an optimal and smooth user experience.

PREREQUISITE

It is necessary to have signed a supply contract with one of the couriers supported by the APP.

Tempo Zero Shipping EDI
Here are the benefits for people who manage sales shipments

✓ **Autonomous management of shipments**
Configure the data provided by the courier independently and flexibly.

✓ **Dashboard with complete control of shipments of all shippers**
- Shipment tracking
- Checking the status of the shipment
- History of requests (even deleted ones)

✓ **Possibility to automatically call couriers directly from Business Central dispatch**

✓ **Support for multi-package shipments**
Organize shipments with different packages for each arder, according to customer needs

✓ **Progress Tracking**
Track shipments in real time, directly from Business Centrai.

✓ **Shipping labels**
Immediately print the labels provided by the courier, without having to access external portals

✓ **Simplified cancellation of shipments**
If necessary, cancel a shipment directly from the dashboard, as long as the courier has not yet taken charge of the goods.
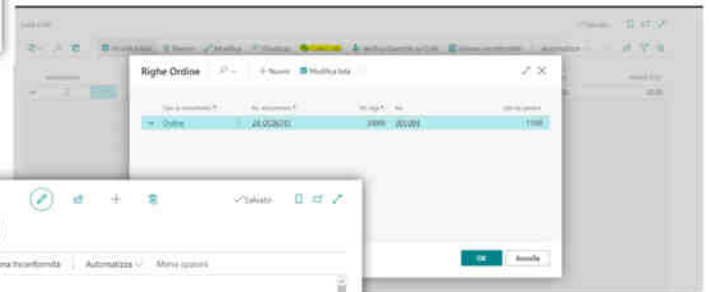

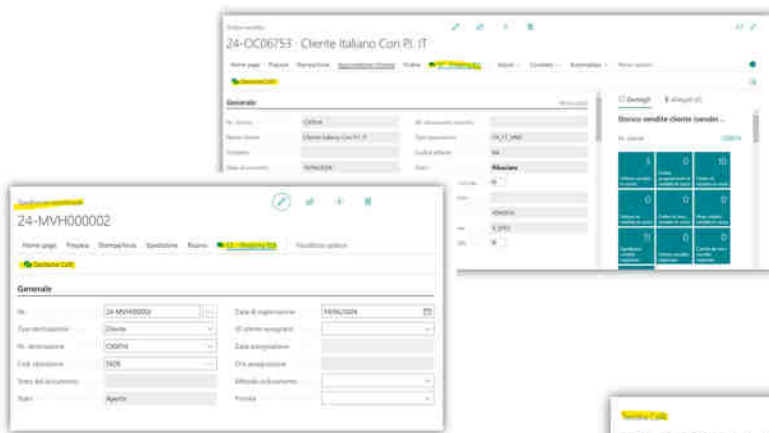

Tempo Zero Shipping EDI
## Sreenshots in Business Central

**From the dashboard in Business Central the person manages the shipments**
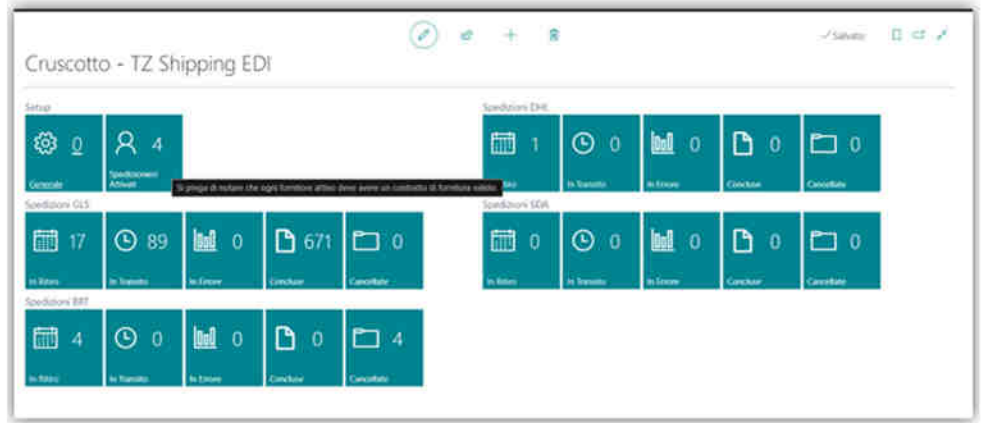

Call to the courier with direct shipment from order or warehouse

Compilation of data regarding quantity, dimensions and weight for each package

Activation of label printing with direct connection to the courier
